SAFEdor

ABOUT US

We at Safedor strive for perfection and have built our reputation on understanding our customers need for fine quality at affordable prices. With the recent amalgamation of two reputable companies, Safedor was formed to service the needs of an industry with quality and service from wholesale to retail.

Years of experience in supplying the hardware industry have been combined with a great appreciation and understanding of our customers need and requirements to source only the best products and raw materials around the world from our wide range of locally manufactured Hollow core doors and hardwood products through to our Ironmongery and Garden tools we aim to do it all.

Our aim is to satisfy all customers daily requirements from chain stores to Independents throughout Africa with the same integrity and good service whether a single door or more. Our stock holdings are unmatched to give our customer peace of mind in a most uncertain global climate with the view that together we are stronger.

With our multiple storage and DC facilities across the country and our two manufacturing facilities in both Pietermaritzburg and Polokwane we are perfectly situated to service all parts of South Africa and the SADC. Our large fleet of vehicles and strategic relationships with all our logistics partners we pride ourselves in our ability to place a pallet of doors delivered to any store in South Africa within 7 days followed with full quality guarantee.

We are at your service.
